GuiScrollBarSetScrollPosition

This function is used to set the scroll amount of a scrollbar as a percentage.

Syntax

```
bool guiScrollBarSetScrollPosition ( gui-scrollBar theScrollBar, float amount )
```

Required Arguments

- **theScrollBar**: The scrollbar you want to change the progress of
- **amount**: a float ranging from 0 - 100 representing the amount you wish to set the scroll bar.

Returns

Returns true if the scroll position was successfully set, false otherwise.
