# FileGetPath

This function retrieves the path of the given file.

## Syntax

```
string fileGetPath ( file theFile )
```

**OOP Syntax** Help! I don't understand this!

> **Method**: *file:getPath(...)*
> **Variable**: *.path*

### Required Arguments

- **theFile:** The file you want to get the path.

### Returns

Returns a *string* representing the file path, *false* if invalid file was provided.
