# GetPlayersInTeam

This function retrieves all the players of the specified team.

## Syntax

```
table getPlayersInTeam ( team theTeam )
```

**OOP Syntax** Help! I don't understand this!

> **Method**: *team:getPlayers(...)*
> **Variable**: *.players*

## Arguments

- **theTeam:** The team you wish to retrieve all the players from.

## Returns

Returns a table of all the players in the team, or an empty one if there are none else false if invalid arguments are passed.
