GetBanAdmin

This function will return the responsible admin (nickname of the admin) of the specified ban.

Syntax

```
string getBanAdmin ( ban theBan )
```

OOP Syntax Help! I don't understand this!

> **Method**: *ban:getAdmin(...)*
> **Variable**: *.admin*
> **Counterpart**: *setBanAdmin*

Required Arguments

- **theBan:** The ban you want to return the admin of.

Returns

Returns a *string* of the admin if everything was successful, *false* if invalid arguments are specified if there was no admin specified for the ban.
