AttachTrailerToVehicle

This function attaches a trailer type vehicle to a trailer-towing-type vehicle.

Syntax

```
bool attachTrailerToVehicle ( vehicle theVehicle, vehicle theTrailer )
```

OOP Syntax Help! I don't understand this!

> **Method**: *vehicle:attachTrailer(...)*

Required Arguments

- **theVehicle**: the vehicle you wish to attach a trailer to.
- **theTrailer**: the trailer you wish to be attached.

Returns

Returns *true* if the vehicle's were successfully attached, *false* otherwise.
