GuiDeleteTab

This function deletes a tab from a tab panel.

Syntax

```
bool guiDeleteTab ( element tabToDelete, element tabPanel )
```

OOP Syntax Help! I don't understand this!

Method: *GuiTab:delete(...)*

Required Arguments

- **tabToDelete:** This is an element representing the tab that you want to delete.
- **tabPanel:** This is the tab panel parent that the tab is attached to.

Returns

Returns *true* the tab was successfully deleted, *false* otherwise.
