IsResourceProtected

This will check if a resource is currently protected, as defined in nrpserver.conf.

Syntax

```
bool isResourceProtected(resource theResource)
```

OOP Syntax Help! I don't understand this!

> **Method**: *resource:isProtected(...)*
> **Variable**: *.protected*

Required Arguments

- **theResource:** the resource to check

Returns

Returns *true* if the resource is 'protected', *false* otherwise.
