GetVehicleMaxPassengers

This function returns the maximum number of passengers that a specified vehicle can hold. Only passenger seats are counted, the driver seat is excluded.

> **Important Note:** Only passenger seats are counted, the driver seat is excluded.

Syntax

```
int getVehicleMaxPassengers ( vehicle theVehicle / int modelID )
```

OOP Syntax Help! I don't understand this!

> **Method**: *vehicle:getMaxPassengers(...)*
> **Variable**: *.maxPassengers*

Required Arguments

- **theVehicle:** the vehicle that you wish to know the maximum capacity of.

OR

- **modelID:** the model id that you wish to know the maximum capacity of.

Returns

Returns an int indicating the maximum number of passengers that can enter a vehicle. Returns **false** if vehicle (or its ID) is a trailer
