GetVehicleComponents

This function gets a table of the components currently on a vehicle.

Syntax

```
table getVehicleComponents ( vehicle theVehicle )
```

OOP Syntax Help! I don't understand this!

> **Method**: *vehicle:getComponents(...)*
> **Variable**: *.components*

Required Arguments

- **theVehicle:** The vehicle you wish to get the components of.

Returns

Returns a *table* containing the name of the component as the key and visibility flag of that component as the value
