GuiGridListGetVerticalScrollPosition

This function is used to get the vertical scroll position from a grid list

Syntax

```
float guiGridListGetVerticalScrollPosition( element guiGridlist )
```

OOP Syntax Help! I don't understand this!

>   **Method**: *GuiGridList:getVerticalScrollPosition(...)*
>   **Variable**: *.verticalScrollPosition*
>   **Counterpart**: *guiGridListSetVerticalScrollPosition*

Required Arguments

- **guiGridlist**: The grid list you want to get the vertical scroll position from

Returns

Returns a integer between 0 and 100 indicating the vertical scroll position, or *false* otherwise.

Requirements

Minimum server version	**n/a**
Minimum client version	**1.3.2**

Note: Using this feature requires the resource to have the above minimum version declared in the meta.xml **<min_nrp_version>** section. *e.g. <min_nrp_version client="1.3.2" />*
