GetLowLODElement

This function return the low LOD element that an element is associated with.

Syntax

```
element getLowLODElement ( element theElement )
```

OOP Syntax Help! I don't understand this!

> **Method**: *element:getLowLOD(...)*
> **Variable**: *.lowLOD*
> **Counterpart**: *setLowLODElement*

Required Arguments

- **theElement:** The element whose low LOD version we want to get.

Returns

Returns a low LOD element if successful, *false* otherwise.
